

EOS M 400

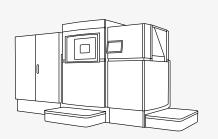

The additive manufacturing system for industrial production of high-quality large metal parts

EOS M 400

Proven DMLS quality for industrial production

With a building volume of 400 x 400 x 400 mm, EOS M 400 allows the production of large metal parts on an industrial scale – directly from CAD data and with no need for tools.

- A 1 kW laser boosts productivity due to higher build rates and increased layer thickness.
- Bilateral recoating of powder material reduces non-productive time.
- A recirculating filter system with automated cleaning reduces filter changes and extends filter lifetime, significantly reducing filter costs.
- Wide range of materials: from light metals to stainless and tool steels to superalloys.

- Easy handling through a high degree of automation in workflow and operation.
- Extensive monitoring features ensure high process stability and part quality.
- Intuitive user interface, flexible software tools and a variety of additional equipment fulfill industrial production requirements.

Scanning speed

Focus diameter

Power supply

Power consumption

Inert gas supply

Dimensions (W x D x H)

Recommended installation space

Weight

400 x 400 x 400 mm (15.8 x 15.8 x 15.8 in)

(height incl. build plate)

Yb-fibre laser; 1,000 W

F-theta-lens

up to 7.0 m/s (23 ft/sec)

approx. 90 μm (0.0035 in)

50 A

max. 20,2 kW / typical 16,2 kW

7,000 hPa; 20 m³/h (102 psi; 706 ft³/h)

4,181 x 1,613 x 2,355 mm (164.6 x 63.5 x 92.7 in)

min. 6.5 x 6 x 3.3 m (256 x 236 x 130 in)

approx. 4,635 kg (10,218 lb)
